The innovative multifunctional emergency call system HOME & GO gives you the safety you need in your daily life. It doesn't matter where or when an emergency occurs. The combined HOME & GO system merges the classic home emergency call system with a mobile system that can be used anytime and anywhere!

In case of an emergency, you will be located within a few seconds and will receive the help you need. A situation in which every second matters!

Why HOME & GO

- Stay safe and independent in your home for as long as possible.
- Be protected even when you are on the move.
- Quick and reliable location in case of emergency.
- Set your own schedule and activity monitor.

The best location system, even when in remote areas

- Flexible end comprehensive tracking
- GSM & satellite tech
- over 98% signal coverage in România
- Using the geofence feature, you can define a zone that will automatically trigger a notification when you leave the area
- Especially useful for people who have difficulty with orientation

easierLife for your relatives

Thanks to the free app, your relatives are immediately informed in case of an emergency and know exactly where the emergency occurred.

For those who care about their independence

Suitable for pre-existing conditions (diabetes, cardiovascular diseases, dementia, epilepsy, etc.)

For active and sporty people (hiking, cycling, walking, and many other activities)

Suitable for single individuals or couples

Always protected HOME&GO – combined emergency system

Always protected

In case of an emergency, choose how you want to be informed and whom you want to inform: automatic call, push notification through the app, or both.
